

Technical counter Cristal Palace.

1. Building site for the mirror tent:

Dimensions of the site should allow for ample space for the surface area of the tent. (See ground plan).

The mirror tent is set up level, therefore the site should be reasonably flat with a maximum slope of 40 cm over 30 m.

The tent can be installed on grass, concrete, paving bricks, tiles, ... Fields or soft soil are not suitable.

2. Installing the mirror tent.

We will not be needing electricity during installation. A 220 volt extension cord would, however, come in handy to test lighting.

Installing the mirror tent is solely manual labour. It is therefore very important that, during installation, the lorry can at all times be parked exactly in front of the tent. (i.e. tailboard touching front of the mirror tent).

Our articulated lorry complies with the maximum allowed dimensions:

total length: 16 m

width: 2.55 m

height: 4 m

total weight: 32 ton

You should also allow for swerving of the trailer: e.g. in a sharp bend or at a right angle through a gate. Should you have any doubts on this subject, then do not hesitate to mention or discuss them beforehand.

With the Cristal Palace in extended version, 4 stakes have to be driven into the ground at the front extension of the tent to guarantee the tent's stability. If this is not possible for any reason whatsoever (see ground plan), e.g. because the surface is too hard or tiled, then the lessee has to see to it that other means of attachment are provided: water containers or nearby trees can for instance be used as well.

3. Flooring of the mirror tent always consists of wood.

4. The bar

The bar comes with the mirror tent and consists of a wooden piece of furniture of 5 m by 0.60 m. It is not equipped with taps, rinsing units or cooling system.

5. Electricity.

For lighting and emergency lighting, the lessee should provide a multiple socket for 6 plugs on the spot indicated with (S) on the ground plan.

6. Interior decoration.

Seating capacity:

Permanent seats in the alcoves: 14 alcoves x 6 people = 84 people. By adding extra chairs and tables, the number of seats can be increased up to 200 people with the normal setup. Seating and standing room is possible for up to 300 people.

EXTENDED VERSION: the standing and seating room is possible up to 450 people.

(with reservation: local authorities can stipulate differently)

Indoor canvases are M1 fire-resistant. Relevant certificates can be faxed on demand.

External canvases are made of fire-resistant PVC (M2). These certificates are at your disposal as well.

Lighting:

The front of the mirror tent is lighted with 4 lamps of 100 watt each. 2 x 10 white lamps (40 watt each) are placed round the dance floor, there are 2 lamps in the entranceway and 5 emergency exit lamps: 1 at each emergency exit, 1 at the entranceway and 2 at the dance floor.

At your request, we can mount 6 staves on the mirror posts, e.g. to attach speakers or spots.

7. Insurance.

The mirror tent is insured with waiver of recourse against fire, storm, accidents and objective liability.

In the normal course of events, the lessee is only liable for material damage to the tent. Contact our insurance company for more detailed information concerning this matter: AMRY, Mr. Koen Torfs, Tel. +32 (0)3 475 01 02.

8. It is strictly forbidden to nail, screw, staple, drill inside the mirror tent or to inflict any other damage.

In case you need to attach something, this should be done by means of plastic adhesive strips. We are counting on your cooperation. Should you have any further questions, then please contact us at: +32 (0)3 311 69 10 or fax +32 (0)3 311 69 51.
